

CIJ Monitor

Monitoring Software for Continuous Inkjet

Keep an eye on your Continuous Inkjet fleet with our innovative software solution - **regardless of the devices manufacturer.**

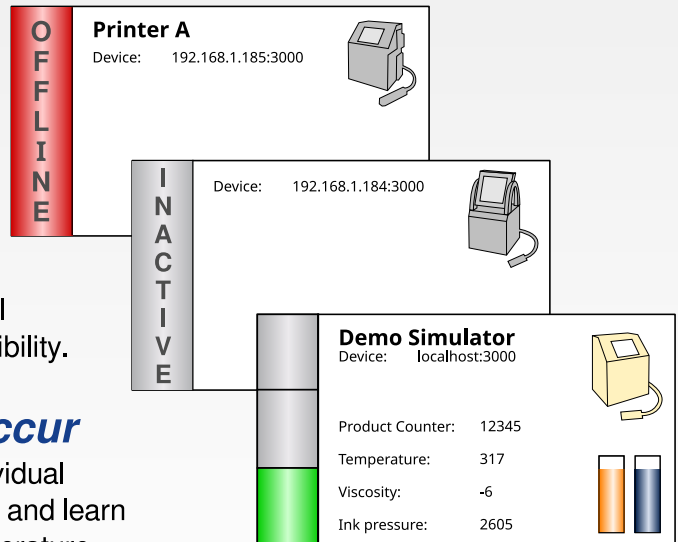

Looking at the dashboard you will see the state of your devices at a glance. Go into detail view to get more information about ink system, performance and actual marking text. A timeline provides information on selected printer parameters. One more click and the manufacturers maintenance tool will be launched - thus we can guarantee 100% compatibility.

Anticipate problems before they occur

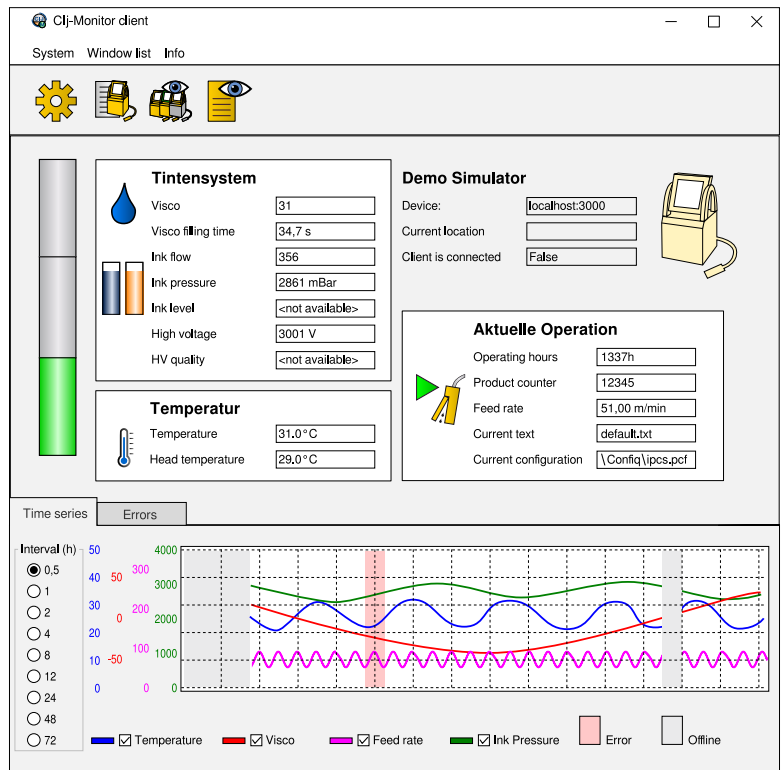

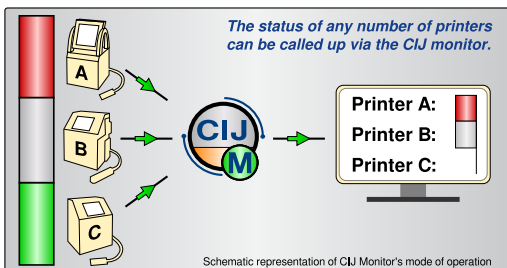

With our reporting engine you get statistical data in individual Excel tables. Simply select a time frame, get your report and learn about minimum, maximum and average values for temperature, viscosity and much more.

Seamless integration into your IT

- CIJ monitor can be installed on Linux or Windows systems and works "cloudless"
- Integration into your ERP / MES systems? No problem, simply use our REST service

Printer states from the overview of the start page

Printer status from the detailed view and time history of selected printer parameters

Printer

- Inkdustry
- Koenig&Bauer
- Leibinger

Operating systems

- Linux
- Windows

Datenbases

- SQLite

Optional

- REST API
- Web Client
